Summary

Aspiring software engineer with a strong foundation in front-end and full-stack development, supported by internship experience and academic projects. Skilled in building responsive, user-friendly applications using modern web technologies, databases, and software engineering practices. Interested in developing practical, clean, and maintainable software solutions in collaborative environments.

Education

Misr International University (MIU)

BSc in Computer Science – Software Engineering Major

Oct. 2022 – Jul. 2026

Cairo, Egypt

Work Experience

Egyptian Bureau for Engineering

Front-End Developer Intern

Jul. 2025 – Aug. 2025

Cairo, Egypt

- Developed and enhanced responsive UI components using **React**, improving usability and layout consistency.
- Collaborated with engineers to implement UI designs and deliver project requirements using Agile methodology.
- Used **Git/GitHub** for version control, branch management, and pull request collaboration.

Graduation Project

CodeAtlas – A Knowledge Graph for Code

2025 – Present

Graduation Project — VS Code Extension, Web Interface, Knowledge Graph, LLM

Misr International University

- Designed a repository understanding system that turns source files, directories, services, configurations, and tests into an interactive knowledge graph.
- Planned both a **Visual Studio Code extension** and a **web-based interface** to help developers explore project structure and code dependencies.
- Used graph-based modeling to support impact analysis questions such as what depends on a file, whether a change is safe, and what may break after deletion.
- Integrated an **LLM-assisted explanation layer** to explain code relationships and graph insights in human-readable language.
- Focused on improving maintainability by highlighting impact paths, duplicate artifacts, unused components, and semantic relationships inside the codebase.

Projects

Tasky – Resource & Time Management Platform | Spring Boot, Thymeleaf, MySQL, Git, GitHub, Jira

- Developed a task management platform to assign, track, and monitor team progress and workload.
- Implemented CRUD operations for projects and tasks with database persistence using **MySQL**.
- Designed UI pages with **Thymeleaf** templates to support structured navigation.

Library Management System GUI | Java, JavaFX

- Built a GUI-based library system to manage borrowing, returning, and inventory tracking.
- Applied object-oriented programming principles to structure modules and improve maintainability.

Calendok – Calendar & Task Planner Web App | PHP, JavaScript, MySQL, HTML, CSS

- Developed a calendar-based planner system with task scheduling and database storage.
- Integrated dynamic UI features using JavaScript with backend processing in PHP.

Movifey – Movie Catalog Website | HTML, CSS, JavaScript, EJS

- Developed a responsive movie catalog website with search functionality and dynamic templates.
- Used EJS templates for structured rendering of movie information.

Technical Skills

Languages: Python, Java, C, C++, C#, JavaScript, PHP, SQL, Dart, HTML/CSS

Frontend Development: React, HTML, CSS, JavaScript, Thymeleaf

Backend & Frameworks: Spring Boot, Node.js, Laravel

Databases: MySQL, MongoDB, Neo4j

Tools: Git, GitHub, Jira, Figma, VS Code

Concepts: Object-Oriented Programming, Agile, Data Structures, GUI Development, Software Testing

Relevant Coursework

Algorithms, Data Structures, Databases, Software Engineering, Networking, Operating Systems, Design Patterns, Testing, Human-Computer Interaction

Certifications

IBM SkillsBuild – Cybersecurity Fundamentals

IBM SkillsBuild – User Experience Design Fundamentals

Cambridge Training College Britain – English Language Training Program

Leadership & Volunteering

Model United Nations (MUN)

IT Member, Delegate

- Supported technical logistics and participated in simulations.

Move Club

Member

- Participated in charity initiatives and community support programs.
